

Dr. Helen Kalorizou
Assistant Professor in Pomology
Email: ekalorizou@upatras.gr
Τηλ.: (+30) 2631058232

EDUCATION

Ptyxio / 5 years B.Sc. Hons in Agriculture (Specialization: Horticulture), School of Agriculture, Forestry and Natural Environment, Aristotle University of Thessaloniki, Greece

Ph.D., University of Reading U.K., Department of Agriculture, School of Agriculture Policy and Development. Thesis Title: "Physiological and anatomical approaches for identifying resistance mechanisms to migratory endoparasitic nematodes among *Musa* varieties"

RESEARCH INTERESTS

- Stress and stress adaptation mechanisms in trees
- Physiological and anatomical evolution of tree's root system.
- Orchard photosynthetic efficiency
- Fruit physiology
- Metabolites and cellular signaling in tree species.
- Nutrition toxicity and immunity among tree species.
- Irrigation, fertilization in commercial orchards
- Mass propagation of tree species.
- Climate change as a multifactorial pressure on trees.
- Urban, aesthetic, commercial and economic pomology
- Management practices for tree genetic resources.
- Digital and robotic pomology.
- Orchard sustainable management; pomological innovation in circular economy.

PROFILE

Dr. Helen Kalorizou is Assistant Prof. of the Department of Plant Sciences, School of Agriculture at University of Patras (Mesolonghi Campus). She holds many years of

research experience in pomology within European Union and International Organizations funding schemes with numerous publications. She is involved in projects related local tree genotypes, nutritional stress, phenotypic plasticity, tissue culture, physiological and biochemical stress analysis, cellular microscopy. In parallel for many years, she served as Senior Technical Advisor & Court Technical Expert behalf of Hellenic Public Power Corporation (P.P.C.) for expropriation activities and hydroelectric flood damages in commercial orchards.
